WHAT DOES PBM CONSENT MEAN?

Our e-prescribe system is now working with the nation's pharmacy benefit managers (PBMs) to connect your eligibility, benefits and formulary information at the time of creating or refilling a prescription. This secure service enables your provider to download medication history and to select medications that are on your formulary and are covered by your insurance drug benefit. It will also allow them access to lower cost alternatives (such as generic versions of your medication) that can be offered to help reduce the copay charged by your insurance company. It will also reduce possible prescription duplications and/or errors and help in the overall coordination of your care. May we have your consent?

AUTHORIZATION TO DISCLOSE INFORMATION - HIPAA PRIVACY AND SECURITY FOR PHI

We need help in protecting your PHI (Personal Health Information)! When completing the bottom portion of our Registration Form it is important to for you to understand that we are ONLY going to release the MINIMUM NECESSARY information to the specific parties you choose. PTO (Payment/Treatment/Healthcare Operations) means coding information will go to your insurance company to help process your claims or for their operational audits and your medical records can be faxed to your other medical providers to help in your treatment plans. The Additional Disclosure Choices are allowing us to discuss your care with relatives or care givers listed specifically by name and the method of communication you choose is indicated in the top part of the form as (phone/email or portal). PLEASE fill out the form completely so ALL staff members can follow your directions correctly to avoid any privacy or security breaches. Thank you for your cooperation and please be assured that you are welcome to complete a new form at any time if you need to make a change to your information or authorizations!
